CHERRY BLOSSOM TEMPLATES

To make a petal pair:

1. CUT out the petal template along the black lines. Then, cut two pieces of rectangular crepe paper of identical size, and fold lengthwise in half, making sure that once folded, the template fits entirely over it.

2. PLACE the bottom of the pletal template along the folded bottom of the crepe paper.

3. CUT the petal shape along the edge of the template. Then open up to make the petal pair.
